

BIEFFEBI SPA

THE EVOLUTION CONTINUES...

Bieffebi, Leading Company, established in 1955 and specialized in the manufacturing of mounter proofer for flexible packaging and corrugated (post-print) will show, among the others, at **CONVERFLEX 2009** :

- **UNICA 343V**: latest generation gearless mounting machine, equipped with a virtual information software, called VIS, which uses the data file from the plate maker; this allows for digital proofing without inks.
- **ALBA 425**: cleaning machine for washing photopolymer flexo plates individually or on sleeves for solvent, UV and water based inks. It cleans the anilox sleeves too. The machine is explosion proof and manufactured according to Atex regulations.
- **ESKO SOFTWARE**: new software specially studied for the OMNIA 338 for corrugated (post-print), which enables the drawing of EPS files coming from the upstream cutting machine.
