

CARTIERE CARIOLARO SPA

COMPANY PROFILE

CARTIERE CARIOLARO SPA is specialized in the production of first-rate paper grades, in a wide range of products that includes both ecological 100% recycled papers for offset and roto-offset printing and special papers made of pure cellulose.

Company policy is to produce high quality papers reconciling industrial development and environmental care.

Constantly searching for new products, always respecting the environment and meeting customers requirements, in the 2002 CARTIERE CARIOLARO SPA obtained the environmental certification **ISO 14001** issued by the prestigious DNV.

All our paper grades are produced without the use of chlorine.

The main production of CARTIERE CARIOLARO SPA is given by the ecological recycled printing papers, both coated and uncoated, with a high opacity and a very good printing that ensure perfect four-color processes and good runability. Our paper grades were awarded several certifications, like **Blue Angel**, by the German Ministry of Environment, **Ecolabel**, that is the recognition that the European Union grant to “Friends of the Environment” and **Green Label of Singapore**.

Moreover, we produce both ecological recycled kraft paper for packaging, brown and white, designed for producing envelopes, shopping bags, sacks, kraft sacks, little bags, etc. and white kraft papers made of pure cellulose, like Mould Paper and Kraft Marking, studied for special packaging.

For all the information about our papers, you can see in the Internet our website
