XGRAF THE TECHNOLOGY AS A MEANS TO HELP BUSINESSES

XGRAF is the management solution designed specifically for businesses like polygraphic, graphic arts, papermaking, publishers, packaging, bindery, lithographs, and cromolitografie Calcografie, paper bags, Sheet, screen printing, printing labels and stickers, printing, zincography.

The product allows you to control and reduce production costs and optimize the production cycle. Through interactive and synthetic graphic views XGRAF allows you to manage and control industrial costs, ensuring the proper management of production processes and increasing production efficiency. It's a client/server multi-database (IBM UDB, DB2/400, SQLMS, Oracle, PostgreSQL) and multi-platform (Windows, Linux and Mac/OS) solution.

Created using OMNISA STUDIO, a graphical object-oriented development environment allowing the engineering of client/server and web applications with OMNISWEB, it offers a two- or three-tier architecture: DB server, processes server, Windows XP of higher. Modifications and customizations can be transferred to newer versions maintaining compatibility at single object-level.
