

EDIGIT INTERNATIONAL SRL

OUR FIRM

For more than twenty-five years, Edigit has been present in the market of management software for Graphic Firms. In detail, it produces and distributes - in both the national and the international market - software which allows an integrated management of Clients' firms, and it also offers to its Clients many services of high professional level. Nowadays, only taking into consideration the Italian market, Edigit has more than 1400 Clients and 36 collaborators.

In the last years, Edigit clients' target has become much higher. From being a firm which in the 80s produced the first estimating systems for specialized SMEs, Edigit has turned into a qualified partner which has produced and implemented integrated computer systems for some of the main Italian industrial groups.

At Drupa 2008, the uninterrupted flow of visitors, coming from different countries to the Edigit stand, has been the demonstration of a huge interest for the single Italian management software exhibitor that was present there.

OUR PRODUCTS

Edigit software has been created for sheetfed-offset and roto-offset printing – rotogravure – flexography – silk screen serigraphy – continuous stationary – preprinting – digital printing – labels – binding and paper products in the following modules:

CRM (Customer Relationship Management) – Estimates – Job sheets – Orders to Suppliers – Logistics and Warehouse – Scheduling – Production Management – Post Calculations – Statistics – Administration (integration with Microarea *Mago.Net* and NTS *Business* management softwares) – Management control – Business Intelligence – Web portal for on-line Estimates and productivity control.

OUR FOREIGN PARTNERSHIPS

Edigit software is available in Italian, French, English, Spanish, German and Arabian and, for some years, they have been present in other German speaking markets (Switzerland, Austria and Germany) thanks to the Edigit's partnership with the PRO-C International SA Company. Recently Edigit began operating in the Spanish market - in cooperation with the O.M.C. SAE Company in Madrid - and, since the beginning of December 2008, it has been operational in the Arabian speaking market, through the Promedia Company placed in Dubai. Our next step, almost completely carried out, will be Edigit's expansion into Romanian market.

EDIGIT INNOVATIONS AT GRAFITALIA 2009

1. New generation software with a new graphic interface, development environment and functionality
2. Integration with ERP SAP R3
3. Integrated systems specific for important sub-sectors
 - Bookbindery
