

INTERFACE s.r.l

INTERFACE RESEARCH AND INNOVATION AT CUSTOMER' S SERVICE !

INTERFACE will be present at Converflex to introduce the most advanced new products of its wide range of equipments in flexography, rotogravure, coating, laminating and much more ! Interface will use this event to showcase to the European and International customers its whole production range of printing presses, coating laminating machines and special converting equipments. The high level of customization of the final products allows a complete series of machines dedicated to specific final products: The CI flexo printing presses like the series named REVENGE, TRINITY, VICTORY AND PRINCESS are available up to 10 colors on CI gearless or gear type, with conventional drying system or for UV inks. These machines work on materials from 600 to 2.500 mm as printing width, with printing repeat from 300 to 1.500 mm, and printing speeds up to 500 mt/min. On request, rotogravure or independent flexo unit can be included in the machine configuration for special application such as varnishing, coating etc. **TRINITY** series is totally sleeve type, equipped with a fast system of job setting .This is a completely new concept in flexo printing which allows a considerable waste reduction and an extremely quick register setting. The machine equipped with semi-automatic or total automatic washing system, web guides, video and non stop winders

The stack type machines LUNA, FEDRA and ALEXA are available up to 8 colors for in-line installation with extruders, paper bag making, film bag making or roll to roll. Interface supplies also a full range of coating laminating machines SOLARIS for solvent/water based adhesive and the LUX series mainly dedicated to the use of solvent-free adhesive, in the compact or standard configuration. Laminating width from 600 to 1600 mm and speeds up to 300/350 mt/min. For the label printing market, Interface has available the latest new series named BLITZ GL.: modern and total new design, very compact and much more.! Technical personell will be available to highlights all the technical features of its equipments and share views and knowledges with customer and friends. For more information please contact by e-mail or via fax .
