

## SIEGWERK - INK, HEART & SOUL

### CENTERS OF EXCELLENCE AND PRODUCTION SITES TO CUSTOMIZE HIGH TECH PRINTING INKS RECIPES AT THE HIGHEST QUALITY LEVEL

Siegwerk, with its HQ in Siegburg Germany, is an International private independent group, this is the guarantee for its soundness and reliability even in challenging times.

Our partners and customers take advantage of our 180 years long expertise in advanced solutions research, applying our inks in packaging, tobacco, graphic and publications industries. Our production system, based on worldwide excellence centres and production sites dedicated to create and improve specialties, keeps us close to every customers taking care of their needs through "taylor made" solutions wherever they operate and giving them the proper means to evaluate the quality of Siegwerk as the best service a products provider. In Siegwerk Italy SpA, located in Novara, we are able to meet the different requirements of all local market segments through a well organized Business Units structure: Flexible Packaging – Plastic, Paper&Label Packaging (PPL), segmented in Sheetfed&UV, Paper&Board and Labels sub-divisions – and Publications.

### NEWS AND PRODUCTS AT OUR BOOTH

A complete range of full ester and alcohol based, NC and vinylic inks and varnishes, for rotogravure and flexo applications. Our Brand TEMPO NUTRIPACK offers a complete series of vegetable based inks for conventional offset applications to food & beverage packaging market. TEMPO FLASH is the first series of in line varnishing UV primerless inks for conventional offset application. Brand SICURA WEB 900 is a laser over printable series of inks for high speed production in offset applications.

The innovative Siegwerk Italy solution for Paper and Corrugated Board applications is Glossy Varnish Avantage.

Our engineering expertise is focussed on high performance varnishes and water based inks recipes for a concrete costs reduction for the manufacturing products industries.

SICURA brand offers a full range of highest performance inks in every application processes: flexo, typographical, offset, screen and UV. Among the others, SICURA LM series in offset/typographic applications is adequate for the food packaging tanks to its odourless and very low potential exhalation properties. INNOVA inks give exceptional appeal to the final products tanks to their gloss, metallic, pearlescent, fluorescent and luminous effects. We also provide Scratch-off systems products for Braille porpouse and foam effect.

In web offset the company is one of the fastest-growing players in the industry. The most modern and cost effective print technology is now available. Working closely with printing machine manufacturer König & Bauer and the print house of the daily newspaper "Badische Zeitung", the Siegwerk experts developed an ink that allows the paper to be printed on a KBA Cortina web offset press, the first waterless coldset printing machine. The ARIDAS inks series was tailored precisely for this highly productive press from König and Bauer. Teaming up the KBA Cortina with ARIDAS also led to significantly less waste
